

Allergy Assessment & Treatment Program

Revolutionize the approach to Atopic Dermatitis in your practice.

Only Heska has the patented technology and expertise to deliver the gold standard in serum IgE allergy testing and immunotherapy treatment.

Patented, industry leading sensitivity and specificity

Customized patient immunotherapy recommendations

Allergen-specific immunotherapy shots or drops

Free world-class support from our team of DVM and RVT experts

The single BEST way to bring atopic patients long-term relief is by treating the SOURCE, not just the clinical signs, of allergy.

Patented allergy testing technology

Industry leading sensitivity

- Detects as little as 10 picograms of allergen-specific IgE.

Absolute specificity

- Eliminates false positives with patented IgE receptor capture technology.

Simple blood test

- No withdrawal necessary prior to testing for most allergy medications.

Rapid and reliable results

- Easy-to-read allergy test results in just 2–3 business days, after receipt of sample through Heska's Veterinary Diagnostic Lab.

Innovative and highly effective treatment

Safe long-term allergy relief

- Immunotherapy is successful in 60–80% of patients.

Two convenient administration options

- Subcutaneous injections or sublingual drops.

Patient specific

- Regionalized and individualized immunotherapy recommendations.

High standard of care

- Heska leads the market in reliable and consistent immunotherapy treatment.

World class support

- Call 800.464.3752, option 5 for case consultations with Heska's veterinary professionals, included with every allergy test and throughout immunotherapy treatment.

Sublingual administration

Subcutaneous administration

See Jethro's before and after with ALLERCEPT treatment!

Jethro battled skin infections for years. He was brought in for euthanasia and ultimately surrendered to our practice because of his ongoing skin infections. Heska's ALLERCEPT® allergy test and sublingual immunotherapy drops have put him on the road to recovery. Treatment is easy and Jethro's quality of life has greatly improved. After 6 months of treatment his coat is growing back beautifully. He has not had a skin infection in months! There are so many pets that can benefit from ALLERCEPT allergy testing and immunotherapy!
